COLLINS KIPROTICH NGETICH

Software Developer (AI & Automation) | Nairobi, Kenya | Remote
+254 723 432 805 | cngetich37@gmail.com | Portfolio | GitHub | Live project | LinkedIn

PROFILE

Software developer with 4+ years of hands-on experience building and integrating business systems: REST and OData APIs, SQL data extraction and validation, workflow automation and finance/HR reporting for end-users across multiple organisations. Builds with Claude and other AI coding tools, and reviews every change before it ships. Full-stack in React, TypeScript and Node.js, with Python and PostgreSQL exposure, a live project on Vercel with code on GitHub, and experience working remotely with clients from scope to UAT and go-live. Looking for project-based AI and automation work that turns messy business documents into checked data connected to the systems clients already use.

CORE SKILLS

AI & automation: Claude API, agentic workflows, Model Context Protocol (MCP), GitHub Copilot, Cursor, process automation
APIs & integration: REST, OData, JSON, Postman, real-time data synchronisation between external systems and ERP, integration design
Languages: TypeScript/JavaScript, X++, SQL (T-SQL), Python (Flask; working knowledge), C#
Data: SQL Server, PostgreSQL, MongoDB, data extraction, transformation and validation, SSRS, Power BI
Web & deployment: React, Node.js, Express, Tailwind CSS, Vercel, Firebase Hosting, Git/GitHub, environment-variable configuration, Azure DevOps, Docker

PROJECTS

UBPMadeEasy - business licence and fee lookup app

ubp-easy.vercel.app | github.com/cngetich37/ubpmadeeasy | React, Node.js, jsPDF, Vercel

- Built and deployed a React app where users search business activities and see licence and finance-act fees by category, with fee calculation from user-entered dimensions.
- Loads data from a Node.js API with debounced requests, searchable dropdowns and loading states; generates shareable PDF summaries in the browser.
- Public GitHub repository with a README covering features, setup and deployment steps.

Tenderpoa - tender management platform

React, TypeScript, Node.js, Express, MongoDB, Tailwind CSS

- Built a full-stack platform with JWT authentication, schema validation (Yup, Formik) and Mongoose-backed data models.

NairobiPay - government revenue tracking platform

D365 Business Central, OData, REST APIs

- Supported implementation of a financial tracking platform integrated with Business Central through OData and REST APIs, improving revenue reconciliation and reporting.

EXPERIENCE

D365 Finance & Operations Technical Consultant | Impax Business Solutions Ltd.

Nairobi, Kenya (remote) | Jun 2024 - Present

- Developed three API-based integrations for real-time data synchronisation between external systems and D365 F&O.
- Engineered 14+ custom forms, classes and tables in X++ that automated workflows and reduced manual processing time.
- Ran SQL Server extraction and transformation to improve data quality for finance and HR analytics; produced five SSRS reports for departmental leads.
- Use Claude and other AI coding tools in day-to-day development, reviewing and testing all generated code before delivery.
- Worked directly with client teams on requirements, UAT and go-live, and coordinated tasks remotely through Azure DevOps.

ICT Officer | Nairobi City County Government

Nairobi, Kenya | Jan 2024 - May 2024

- Developed four SQL-based operational reports and three Power BI dashboards consolidating multiple datasets.
- Provided remote D365 Business Central support, documented workflow requirements and trained end-users.

Pre-Sales Engineer | Intracom Africa Ltd.

Nairobi, Kenya | Jul 2023 - Dec 2023

- Built four technical prototypes demonstrating real-time ERP integrations and three solution architecture diagrams for prospective clients.

- Gathered client requirements, matched them to technology stacks, wrote technical documentation and delivered remote demonstrations.

Earlier roles

- System Support Officer, Nairobi City County (NairobiPay) | Jan 2023 - Jun 2023: REST API-based support for a revenue platform.
- Business Application Support, Kenya Revenue Authority | Jan 2022 - Dec 2022: application support using REST APIs, Dynamics ERP and Python.
- Junior Software Engineer (intern), FarmDrive | Mar 2018 - Aug 2018: Python, Flask, PostgreSQL, REST APIs and Git.

CERTIFICATIONS

- AI Automation with Anthropic Claude API's Agentic Computer Use (LinkedIn, Jul 2025)
- Model Context Protocol (MCP): Hands-On with Agentic AI (LinkedIn, Jul 2025)
- AI Coding Agents with GitHub Copilot and Cursor (LinkedIn, Jul 2025)
- MB-500: Microsoft Dynamics 365 Finance & Operations Developer (2024)
- Azure Service Bus (Jun 2025) | From SQL to MongoDB's Document Model (Mar 2025) | Data Science with Python (2022)

EDUCATION

B.Sc. Informatics, Moi University, 2020

LANGUAGES

English (fluent), Swahili (native)
